Journal of Biochemical and Biophysical Methods, 19 (1989) 353–355
Elsevier

Contents of Volume 19

No. 1

Reviews

P.G. Righetti (Italy)
Of matrices and men 1

E. Boschetti (France)
Polyacrylamide derivatives to the service of bioseparations 21

Research Articles

P.G. Righetti, M. Chiari, E. Casale, C. Chiesa, T. Jain and R. Shorr (Italy, U.S.A.)
HydroLink™ gel electrophoresis (HLGE). I. Matrix characterization 37

C.L. Smith, C.M. Ewing, M.T. Mellon, S.E. Kane, T. Jain and R.G.L. Shorr (U.S.A.)
HydroLink™ gel electrophoresis (HLGE). II. Applications of a new polymer matrix to dsDNA analysis 51

C.L. Smith, C.M. Ewing, M.T. Mellon, R.G.L. Shorr and T. Jain (U.S.A.)
HydroLink™ gel electrophoresis (HLGE). III. High DNA loading capacity and recovery of dsDNA 65

K. Muramoto, H. Tanaka, S. Kimura, K. Kubo, S. Yoshihara, M. Yokoyama, Y. Yoshida and M. Endo (Japan)
Quantitative determination of sulfated glycopeptide by two-dimensional electrophoresis on cellulose acetate membrane 75

D. Qin-ye, Z. You-min, X. Shu-hui and W. Yong-chao (China)
Microcalorimetric measurements of tissue cells in vitro 83

L. Holmquist (Sweden)
Separation of free and apolipoprotein D-associated human plasma lecithin:cholesterol acyltransferase 93

L. Orbàn, J.V. Sullivan and A. Chrambach (U.S.A.)
A thin-layer multistrip agarose gel electrophoresis apparatus for Ferguson plot analysis at the sub-microgram load level 105

D. Sha'ag (Israel)
Sodium dodecyl sulphate dependent NADPH oxidation: an alternative method for assaying NADPH-oxidase in a cell-free system 121

0165-022X/89/$03.50 © 1989 Elsevier Science Publishers B.V. (Biomedical Division)

No. 2/3

Research Articles

R.I. Roth and J. Levin (U.S.A.)
Amplification of chromogenic staining of proteases within electrophoretic gels 129

K. Hashimoto, N. Tatsumi and K. Okuda (Japan)
Introduction of phalloidin labelled with fluorescein isothiocyanate into living polymorphonuclear leukocytes by electroporation 143

J. Biernat, U.B. Göbel and H. Köster (F.R.G.,, U.S.A.)
New bacteriophage vectors for the large scale production of single stranded insert DNA 155

E.R. Tovey and B.A. Baldo (Australia)
Protein binding to nitrocellulose, nylon and PVDF membranes in immunoassays and electroblotting 169

K.-E. Johansson and G. Bölske (Sweden)
Evaluation and practical aspects of the use of a commercial DNA probe for detection of mycoplasma infections in cell cultures 185

I. Šafařík (Czechoslovakia)
Spectrophotometric determination of proteolytic activity in coloured solutions 201

K. Takagaki, A. Kon, H. Kawasaki, T. Nakamura and M. Endo (Japan)
Preparation and application of a fluorogenic substrate for endo-β-xylosidase 207

P.L. Turecek, E. Buxbaum and F. Pittner (Austria)
Quantitative determination of pectic substances as an example of a rhamnopolysaccharide assay 215

A. Jungbauer, C. Tauer, E. Wenisch, F. Steindl, M. Purtscher, M. Reiter, F. Unterluggauer, A. Buchacher, K. Uhl and H. Katinger (Austria)
Pilot scale production of a human monoclonal antibody against human immunodeficiency virus HIV-1 223

Short Notes

J.J. Bara, S.M. Szubińska and L. Misiak (Poland)
Mössbauer and ESR study of iron in livex – a product of blood 241

M. Hoenig, R.J. Lee and D.C. Ferguson (U.S.A.)
A microtiter plate assay for inorganic phosphate 249

M.V. Rekharsky, O.A. Rodionova, E.N. Nemykina, S.I. Kharitonov and S.V. Belyaev (USSR)
Microcalorimetric detection of sucrose admixture in glucose samples 253

Announcements 257

No. 4

Research Articles

G.E. Dobretsov, N.K. Kurek, V.N. Machov, T.I. Syrejshchikova and M.N. Yakimenko (U.S.S.R.)
Determination of fluorescent probes localization in membranes by nonradiative energy transfer 259

A.N. Osipov, L.S. Vartanyan, O.A. Azizova and Y.A. Vladimirov (U.S.S.R.)
Neutrophil superoxide production measurement by means of stable nitroxide radical accumulation detected by ESR 275

T.N. Collingwood, M. Shanmugam, R.M. Daniel and A.G. Langdon (New Zealand)
M(III)-facilitated recovery and concentration of enzymes from mesophilic and thermophilic organisms 281

J.M. Chapman and R.W. Curley, Jr. (U.S.A.)
Affinity chromatographic purification of serum retinol-binding protein using 4-substituted aminoretinoids 287

N.M. Rao and R. Nagaraj (India)
A recycling assay for alkaline phosphatase applied to studies on its transport in *E. coli* K12 301

N. Chongxing, T. Shuntao and C. Daixiong (China)
Determination of glucose-6-phosphate dehydrogenase isoenzymes of human erythrocytes by a thin-layer PAG-IEF procedure 309

B. Riis, S.I.S. Rattan and B.F.C. Clark (Denmark)
Estimating the amounts of ADP-ribosylatable active elongation factor-2 in mammalian cell-free extracts 319

P. Aroca, J.R. Jara, A. Blazquez, J.C. García-Borron and F. Solano (Spain)
A reexamination of the melanin formation assay of tyrosinase and an extension to estimate phaeomelanin formation 327

D.W. Bardsley, W.T. Coakley, G. Jones and J.E. Liddell (U.K.)
Electroacoustic fusion of millilitre volumes of cells in physiological medium 339

Short Note
Z.-J. Liu, N.-H. Wu and Y.-F. Shen (China)
A method for simultaneous detection of the transcripts of different cellular genes 349
